Professional Training on Privacy

Putting PETs into practice

WHO HAS HEARD ABOUT ABC BEFORE?

WHY DO WE WONDER THAT NOBODY BUILDS PRIVACY-PRESERVING SYSTEMS?

Average System and Software Developers ...

- ... are not aware of data protection laws (at least not the details)
- ... are not familiar with privacy impact assessments
- ... are not aware of existing PETs
- ... are focused on implementing functionality before the deadline

PRIPARE will ...

- ... create training material that is suitable for different target audiences, including professional training of system and software engineers
- ... reach out to research projects and industry professionals to invite them to our training and support activities
- ... organize a training workshop in 2015 which will include presentations and hands-on activities like conducting a PIA or integrating PETs
- ... support some research projects in addressing their privacy issues

Expected Benefits of Training and Support

- Feedback to enhance our training material
- Spreading the word to other developers about PRIPARE and its results
- Direct influence on the results of some research projects
- Better adoption of PRIPARE results and privacy patterns

Next steps (1)

- If you have a project that may require consulting and support on privacy, PRIPARE can help
→ <http://pripareproject.eu/outreach/>
Expression of interest now open until
06.07.2014

Next steps (2)

- If you want to learn about state of the art on
 - privacy and data protection legislation
 - organizational measures and the PRIPARE methodology
 - privacy enhancing technologies
- including
 - presentations
 - scenario-driven hands-on training
- join our training workshop!
 - follow @Pripare4PbD on Twitter or LinkedIn Group PRIPARE (or monitor our webpage)
 - Call for Participation in autumn
 - ~ March/April 2015 in Ulm, Germany

PR^eparing Industry to Privacy-by-design by supporting its App^lication in RE^search

Thank you for your attention
